

LOGISTICS

Würth Business Services provides a sustainable value by coordinating all the shipment-related tasks. Our Logistics Team is responsible for various tasks related to tracking & managing shipments and sending the updated information. We organise shipments, answer shipment-related queries, and track them as they progress through the supply chain.

ADJUSTING FAR-EAST ORDERS IN SAP

In this process, purchasers update the required quantity of products in SAP system. We send the requirement to suppliers. Then we receive the invoice that mentions the available quantity from the suppliers. Our Logistics Team adjusts the quantities according to the requirement and availability. Furthermore, we create loading lists, commercial invoices, and packing lists for customs clearance. These invoices and lists are uploaded to the Transport Management Information System (TMIS) portal. Customers can streamline the custom clearance process and authorise payments based on order details.

PROCESS FLOW AT WÜRTH BUSINESS SERVICES:

- **Step 1:** Updating invoices, packing lists, and loading lists provided by suppliers on the TMIS portal
- **Step 2:** Entering price, quantity, Estimated Time of Arrival (ETA), and weight according to the documents provided in SAP system
- **Step 3:** Generating tariff list and uploading the documents on the TMIS portal
- **Step 4:** Registering articles with detailed and accurate information on the TMIS portal

BENEFITS:

- Streamline the custom clearance process
- Plan the estimated time of delivery effectively
- Authorise payments by considering the received orders details
