

# LOGISTICS

Würth Business Services provides a sustainable value by coordinating all the shipment-related tasks. Our Logistics Team is responsible for various tasks related to tracking & managing shipments and sending the updated information. We organise shipments, answer shipment-related queries, and track them as they progress through the supply chain.

## CREATION OF SHIPMENT

Würth Business Services organises road shipment(s) within the European Union (EU) countries that have the Ex Works (EXW) incoterm. The shipments are organized on the Transport Management Information System (TMIS) portal. These shipments also include the direct deliveries that need to be picked up from the supplier and delivered to the customer. We also organise return shipments from the customer to the warehouse. Data related to all the organised shipments is maintained in the system for the future reference.

### PROCESS FLOW AT WÜRTH BUSINESS SERVICES:

- ♦ **Step 1:** Organizing the shipments with the help of shipment details received from the sender
- ♦ **Step 2:** Mentioning shipment details such as order and material number, quantity and number of packages, Würth article number, and contact details of the consigner
- ♦ **Step 3:** Registering all the shipment details and creating shipment number and label for future reference and tracking

#### BENEFITS:

- Transport goods from the point of departure to the point of consumption without any hassles
- Smooth procurement process and maintenance of the correct Würth article data
- Simplified process for identifying goods in a warehouse and prioritizing them if necessary
- Smooth transfer of goods and clear communication
