

LOGISTICS

Würth Business Services provides a sustainable value by coordinating all the shipment-related tasks. Our Logistics Team is responsible for various tasks related to tracking & managing shipments and sending the updated information. We organise shipments, answer shipment-related queries, and track them as they progress through the supply chain.

CREATION OF TARIFF LISTS

In the creation of a tariff list process, a detailed information about each material such as price, net weight, and others is provided for customs clearance. A tariff list is a part of shipping documents that facilitate the inspection process. Moreover, it plays an important role in occurrence of any unfortunate events such as shipment damage or accident.

PROCESS FLOW AT WÜRTH BUSINESS SERVICES:

- ◆ **Step 1:** Receiving documents such as invoice and packing lists from the suppliers in the Transport Management Information System (TMIS) portal
- ◆ **Step 2:** Entering the invoice orders in SAP and exporting data in excel format, which is a loading list of that particular invoice
- ◆ **Step 3:** Entering order price, net weight, and gross weight as per the invoice
- ◆ **Step 4:** Creating packing list in excel along with correct product names
- ◆ **Step 5:** Creating a pivot table
- ◆ **Step 6:** Adding pallet costs and discounts if mentioned in the invoice
- ◆ **Step 7:** Uploading the completed loading list in the TMIS portal

BENEFITS:

- Inspect the shipments thoroughly
- Check the shipment load to ensure shipment security and transport
- Beneficial in case of any unfortunate events such as an accident or damage to the shipment
