

LOGISTICS

Würth Business Services offers a wide range of the Logistics Support services to ensure a seamless experience of shipment delivery for companies within the Würth Group. We aim to accelerate logistical operations by assisting Logistics teams in executing various processes. We have a team of experienced and well-trained professionals who excel in handling non-core processes.

TRACKING OF SHIPMENT AND ETA ADJUSTMENT

This process involves the Tracking of Shipment using the container number and the vessel number. We avail the information about the Estimated Time of Arrival (ETA) of the vessel at the port using these details. Furthermore, we update this ETA in the Transport Management Information System (TMIS). However, under the ETA Adjustment process, we update the changes in ETA in TMIS.

PROCESS FLOW AT WÜRTH BUSINESS SERVICES:

- **Step 1:** Track the shipment using container number and vessel number received from the customer
- **Step 2:** Update the ETA information in TMIS
- **Step 3:** Adjust the ETA based on the changes in schedule

BENEFITS:

- Predict the delivery time by tracking shipments
- Manage the warehouse space for newly-arriving shipments
- Prepare documents for customs clearance
