

PRODUCT ARTICLE MASTER

Würth Business Services handles the article data management operations related to the Product Article Master Department. We handle a wide range of processes for maintaining the accurate and standardized article data through SAP system. Our Team utilizes the advanced tools and software, implements standard procedures, maintains quality standards, and efficiently manages and maintains the article data.

PACK SIZE CHANGE

In this process, if the customer wishes to change the pack size, we change in pack size the Enterprise Resource Planning (ERP) system. The size of certain packaging units are already entered in the system as the requirements of customer. However, owing to circumstances, if the customer wishes a special pack size, we change the pack size in the ERP system, so supplier will possess the knowledge of the change and send accordingly.

PROCESS FLOW AT WÜRTH BUSINESS SERVICES:

- **Step 1:** Receive old and new pack size details
- **Step 2:** Verify quality checklist and the status for the old pack size
- **Step 3:** Create a new pack size and pack quantity
- **Step 4:** Add details such as buyer code & price
- **Step 5:** Mention the quality checklist same as the old pack size
- **Step 6:** Change the status of the pack size to active upon creating new pack size
- **Step 7:** If instructed in the details received, discontinue the old pack size with the follow-up material number
- **Step 8:** Notify the customer that a new pack size has been created

BENEFITS:

- Save time in manually creating new pack sizes
- Provide the accurate knowledge of pack sizes to suppliers
- Experienced and trained professionals to ensure accuracy in process execution
