

PURCHASING

The Purchasing Department of Würth Business Services is equipped with a team of highly experienced procurement and purchasing professionals. We are instrumental in fulfilling the business-specific requirements by handling different processes related to Purchasing and serving customers across the globe. Among many non-core procurement and Purchasing-related processes handled by us, Inspection Plan Creation is one of the major processes.

INSPECTION PLAN CREATION

In this process, our team creates a checklist for physical inspection of an article. This checklist ensures that quality standards are met and the customer requirements are fulfilled. We collaborate with our customers to obtain all the documents and information needed for creating a checklist. Based on an extensive analysis, we determine the parameters to be checked, create a thorough plan and submit it in the Enterprise Resource Planning (ERP) system. So whenever you source the articles from the suppliers, you already possess an inspection plan to check them.

PROCESS FLOW AT WÜRTH BUSINESS SERVICES:

- **Step 1:** Obtain drawings & specifications for articles
- **Step 2:** Analyze articles and compare them with standard parts
- **Step 3:** Devise major attributes and parameters to be checked
- **Step 4:** Create a thorough inspection plan and checklists

BENEFITS:

- Get precise, customized and reliable inspection plans
- Streamline and speed up physical inspection process
- Save time and costs incurred in reproduction of articles
- Throughout support and feedback incorporation
